**FCC Certification Requirements**

Caution: Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

---

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television

---

reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The USB receiver can be stored into the wireless presenter for easy carrying.

7) On/off power switch

The wireless presenter is equipped with an on/off power switch.

8) 2.4G RF frequency, which is an ISM free frequency and can be used world-wide.

9) Plug-and-play simplicity

The mini USB receiver supports plug and play technology. No driver is required. Just plug the receiver into the USB port of a laptop and it starts to work within a few seconds. The transmitter and receiver in the factory have

---

matched the frequency.

10) One AAA battery, easy to replace.

11) Class 3R laser, which is safe for kids and pets.

### **III. Who should have this device**

All the people who present with PowerPoint and a projector, such as teachers, trainers, businessmen, will need this device.

### **IV. Operation system**

Windows 7, Windows 8, Mac OS, Linux, Android

### **V. Package contents**

- 1) Wireless presenter
- 2) User Manual
- 3) AAA battery\*1
- 4) USB receiver(The transmitter and receiver in the factory have matched the frequency.)

---

**VI. Specifications****Transmitter**

Technology:	Radio Frequency
Frequency:	2.4GHz
Control Distance:	50m
Laser:	Class 3R
Laser Distance:	>200m
Wavelength:	650nm, red
Battery:	AAA Battery*1
Working Voltage:	1.5V
Sleep Current	<10uA
Dimension:	138*18*13mm
Weight:	16g

**USB Receiver**

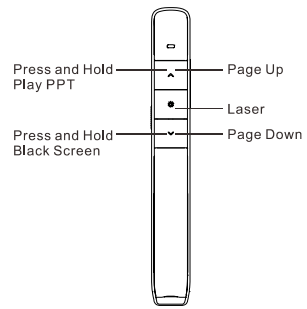

Operation System:	Windows 7/8, Mac OS, Linux, Android
USB Version:	USB 2.0
Working Voltage:	5V DC
Dimension:	24.68*13.8*5.14mm
Weight:	2.1g

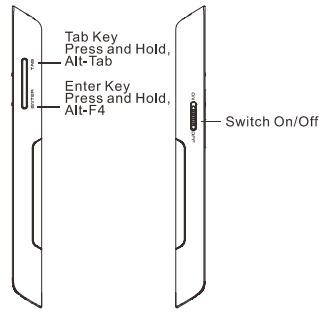

---

## Getting Started

### VII. Function map

#### **VIII. Function Description**

- 1) Open Microsoft PowerPoint and PowerPoint files.
- 2) Press "Page Up" button for 2 seconds to play slides from the current page. Press the button for 2 seconds again to escape from the full screen.
- 3) Press "Page Down" button and "Page Up" button to go forward and backward.

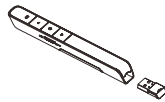

- 
- 4) Press "Laser Pointer" button to turn on the laser
  - 5) If hyperlinks exist on the page, "Tab" button can be used to jump among them and "Enter" button can be used to open the hyperlink.
  - 6) After the hyperlink is opened, you can press and hold "Tab" button to switch between all opened application windows. Release "Tab" button to turn to the window you want to switch to.
  - 7) You can press and hold "Enter" button to close the current window.
  - 8) By default, the page up/down buttons function as Left/Right Arrows. When the page up/down buttons are pressed at the same time for the first time, it will function as Up/Down Arrows. For the second time, it will function as Page Up/Down. For the third time, it will function as Left/Right Arrows again. Every time the functions are changed, the functions are stored unless you change them next time, even you turn off and turn on the wireless presenter again. Through this

---

means, the presenter can support  
PowerPoint, Keynote and Prezi.

**Installation**

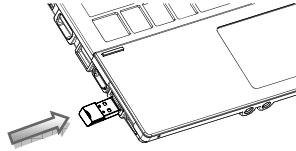

- 1) Take out the mini USB receiver from the  
wireless presenter

Take out the mini USB receiver from the  
wireless presenter. Push the power switch to on  
position; you can press any button to check  
whether the power is on or not. If the LED is  
flashing when the button is pressed, it means the  
wireless presenter is turned on.

---

2) Install the USB receiver

Please plug the receiver into the laptop's USB port. The system will automatically detect the device. Follow the steps to search the driver of the USB device and complete the setup.

3) Operate the wireless presenter

When a button is pressed, the blue LED on the wireless presenter will flash. When the USB receiver receives control signal, the LED (if have) on the USB receiver will flash too.

4) Turn off the wireless presenter

Plug the mini USB receiver into the wireless presenter, and push the power switch to off position.

---

### Frequently Asked Questions

1) How to know the battery is out of power?

If the blue LED on the wireless presenter starts to flash slowly, it means the power is low and the battery needs to be recharged.

2) The laser pointer does not work, why?

Firstly you need to turn on the power. Secondly you can check whether the wireless presenter is in low power or out of power. If the LED flash slowly, it means the power is low and the battery needs to be replaced. If all the other buttons can work, only the laser pointer cannot work, the laser diode may need replacement.

3) When the mini USB receiver plugs into the PC USB, the laptop does not detect the device, why?

Please try another USB port or another PC.
